ART385 Design Document for Interaction Design

The ART385 Design Document emerges from a few different sources, including traditional [software design documents](#) and interface design workflows. The idea is to convey a design and code structures that run along with it.

Re-state the Assignment
The assignment is to create a state machine where every 4 button clicks an LED lights up.

Reflections

For this assignment, I tried to keep it super basic. I had to restart because I realize I just don't have a grasp on the coding. Thursday's lecture helped me A LOT so thank you for that!!!! And I know there's GitHub repo's of our classmates' codes- but being able to hear

them explain it line by line and hear the many ways to do the assignment helped me realize some of my mistakes.
